### CAREERS AT RAVENSHALL

**LABOUR MARKET INFORMATION**

What do people do in this job/industry?    How many people work in this job/industry?    What qualifications do I need for this job/industry?    How much do people get paid to do this job?    What skills and qualities do I need for this job?

What are the typical working hours for this job/industry?    What percentage of men and women work in this job/industry?    Where can this job/industry take me in the future?    Where are these jobs located around the country?    How many of these jobs will there be in the future?

No.2 Gatsby Benchmark is 'Learning from career and labour market information (LMI)'. Questions that came out of the recent pupil careers survey were often related to this area. Pupils were particularly interested in how much they get paid for working different jobs. Next half term there will be a LMI display board on the main corridor and I will send subject specific posters to put up in classrooms with relevant LMI.

During the Autumn term pupils from both Employability pathways have been using IT to compete in a design and enterprise competition. The Big Inventor Challenge was run by Big Potato Games and I am pleased to announce that E13's 'The Game of the Cheese' was selected as one of three national winners. Well done to the team on an amazing achievement!

At the end of next half term it is National Apprenticeship Week. This is an opportunity for us to raise the profile of apprenticeships within the school and celebrate the positive impact they make on communities, businesses and the wider economy. The theme for 2024 is 'Skills For Life'. I will be sharing resources ahead of National Apprenticeship Week but kindly ask if anyone working in School has completed an apprenticeship in the past and would like to share their experiences please let me know at the start of next half term.
